

Safe. Dependable. *Because we Care.*

## SRW 2 Type A School Bus

The Titan Bus SRW model is a new standard in the Type A school bus market. Designed with 83 inches of interior width, providing the ability to offer 16 passenger seating in a 4 section body while still offering a 14 inch aisle. An all Galvanized steel cage construction provides all of it's occupants a safe, secure ride.

Titan's state of the art electrical system takes the old model rocker switches and replaces them with a modern touch screen and advanced electrical control nodes. The flexibility that the system provides allows many options to be added without making huge additional changes to the electrical package.
